

*Note that this is highly likely to be inaccurate as Iowa's court database is not up to date.

Criminal Activity Post-Housing

Above: A bar chart comparing the frequency of those who have a record of criminal activity after being stably housed to those who have not.

THANK YOU

Conclusion

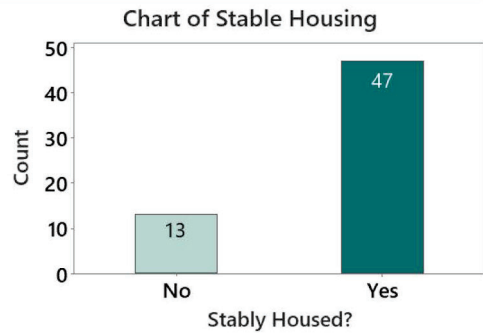

Success: Waypoint is becoming more efficient. There are more clients being stably homed faster with less needed money.

Cautions: The data here is neither representative nor as overarching as it would ideally be. We would need more resources and information.

Stable Housing for the Previously Incarcerated

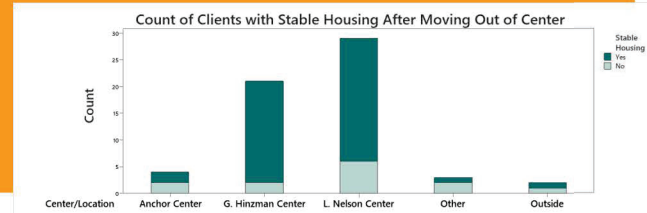

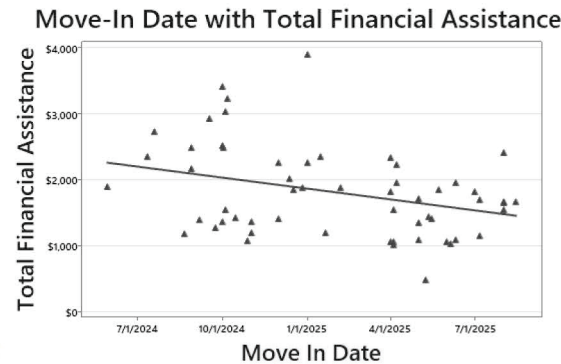

TBD (The Best
Division)

Above: 78.3% of clients who have received financial assistance in Waypoint are stably housed.

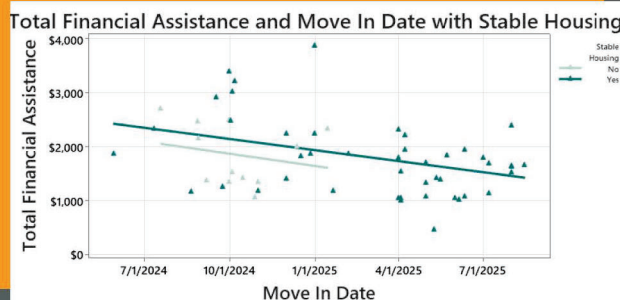

Below: As time goes on, individuals are receiving less financial funding. Waypoint awards two months of rent, meaning Waypoint is finding homes for cheaper.

Above: Whether individuals are stably housed or not at each center. Hinzman and Nelson center each had significantly more individuals stably housed than not, and are the largest populated centers.

Comparing Total Finances Awarded

The 50th percentile for those stably housed is **\$1,692**, whereas the 50th percentile for those not stably housed is only **\$1,764**.

The median time it takes to indicate unstable housing is **109 days**.

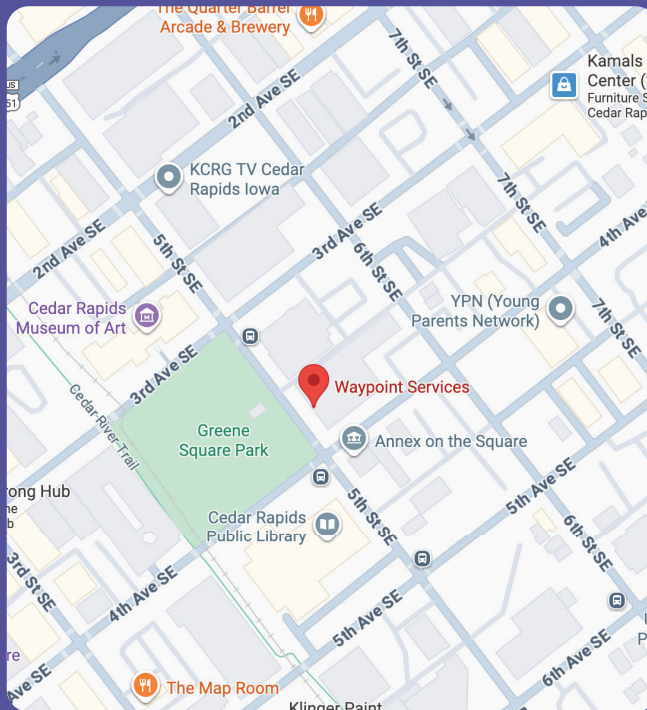

Left: As time goes on, individuals are receiving less money. However, since 1/15/2025, every individual that moved in has kept housing stability.

Data Analysis

What factors
influence housing
stability for
Waypoint's clients?

LOCATION

318 5th St. SE
Cedar Rapids, IA 52403

CONTACT

WHAT IS WAYPOINT?

- An organization located in Cedar Rapids, IA
- Provides financial assistance and housing resources to previously incarcerated clients
- Partnered with Cornell College to determine what influences their clients' abilities to achieve housing stability

WHAT IS HOUSING STABILITY?

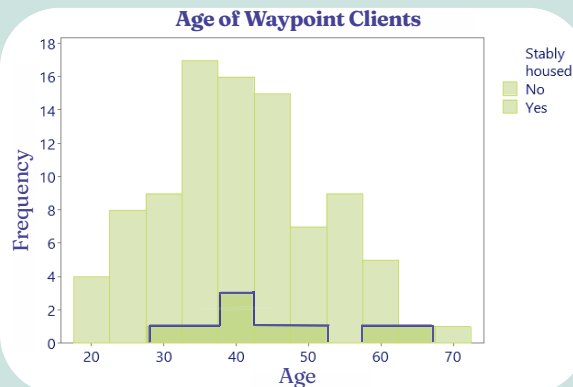

- Having lived in one residence for at least 3 months and the rent for the residence being less than 50% of a client's income

Cornell College

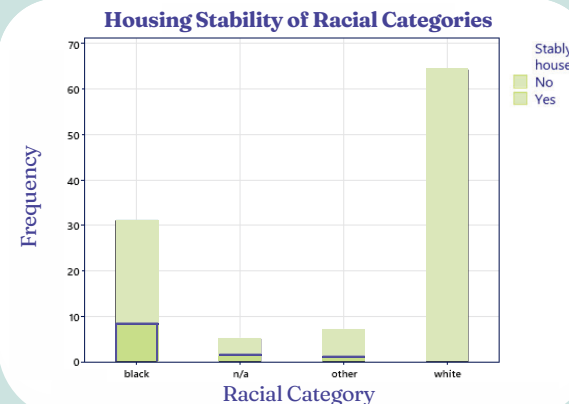

What does our sample look like?

- A list of all current/former Waypoint clients that have been incarcerated
- Proportional to the overall population of Cedar Rapids in terms of race and age
- NOT proportional in terms of gender so we cannot use as a variable in our analysis
- What factors determine housing stability?

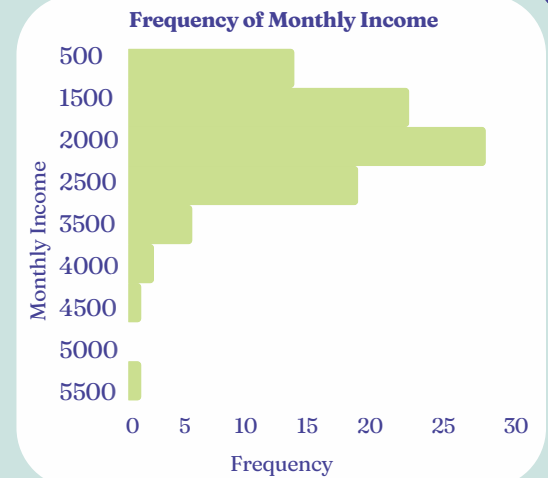

- Stably/unstably housed clients are **proportionate to client age**
- Age is **not** a factor in determining housing stability

WHAT INFLUENCES A CLIENT'S ABILITY TO BE STABLY HOUSED?

- **90.7%** are considered stably housed
- **8.5%** of Cedar Rapids residents are black
- Black clients make up **81%** of the unstably housed

- Average monthly income is **\$2,340**
- **87.8%** of clients are over the poverty line (\$1,500 monthly)
- Average rent in Cedar Rapids is **\$800-\$1,400**
- **82.2%** can afford the lowest average rent as less than 50% of their income
- Landlord's willingness to rent to previously incarcerated individuals could potentially contribute

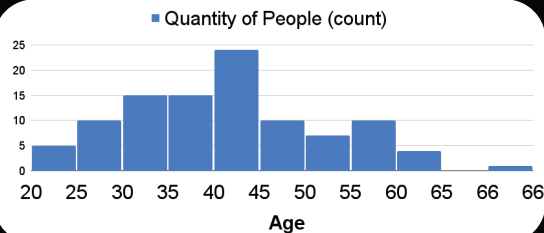

Summary

Housing stability is **not determined by age and race variables.**

Black clients were **disproportionately unstably housed**, likely caused by systemic racism resulting in reincarceration.

Factors including **income and ability to stay out of prison** played the largest role in having housing stability.

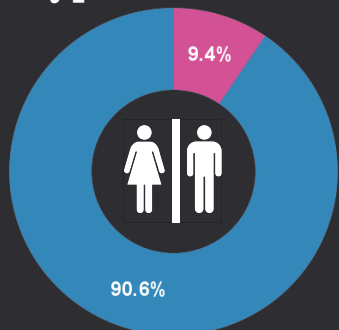

Community Demographics

Age of People in waypoint service

Adults between 40 and 45 make up the largest age group in need of housing assistance.

Gender Ratio in Waypoint Services

Men take less time to go through the program meaning Waypoint can help a larger quantity, whereas women take longer which means less women go through the program.

WAYPOINT

Waypoint offers a variety of proactive services and resources for those experiencing housing instability, poverty, or violence or needing access to quality, affordable child care.

Background

Waypoint provided data to analyze housing stability and the relationship between committing crimes after entering the program. The purpose of this project was to evaluate how effective Waypoint's Homeless Diversion Program was at supplying resources to obtain stable housing. To determine if a participant had stable housing, criminal records were retrieved and cross compared to referral dates within the data. Graphs are used to display the findings.

Research Questions

Count of Crime Committed after Waypoint

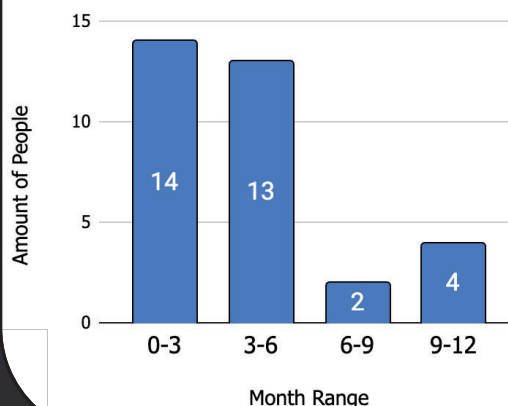

How many People achieved stable housing?

While the data does not provide a complete picture of housing stability on its own, an estimate was made using criminal records. The chart above shows that the majority of individuals were able to achieve stable housing, while a smaller portion did not. This suggests that, despite challenges, many participants benefit from the Homeless Diversion Program.

Months Between Contact and Crime

Of the people who committed a crime

Time Between Referral and Crime

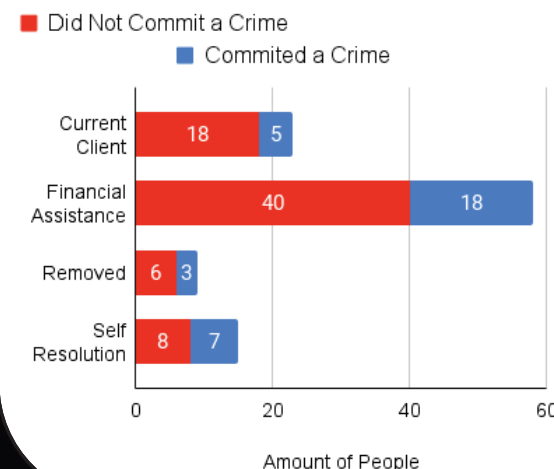

Waypoint asked for the evaluation of their service by examining crime rates after individuals entered the program. Only individuals who committed crimes are represented in the chart, which shows the time between referral and the crime. Most incidents occur within the first 3–6 months, which suggests this may be a critical period where additional support and intervention could make the greatest impact.

56%

Of people within the homeless diversion/eviction program received financial assistance between 2024-2025

Quantity of Crimes in Status Categories

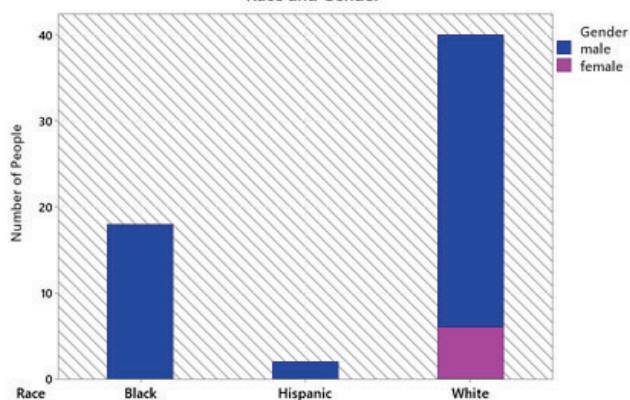

Crime Rates in Waypoint Status Groups

The Waypoint program organizes individuals into four separate status groups, each reflecting their stage in the program. The chart above compares crime activity within these groups, highlighting whether individuals are more or less likely to commit crimes. This information can help Waypoint identify patterns and determine which areas may need additional focus or support.

GENDER & RACE

Race and Gender

- Majority white, about $\frac{1}{3}$ black, and only 2 hispanic
- 9-1 Ratio male to female
- Shows disparity of women in program

6-54

GOALS

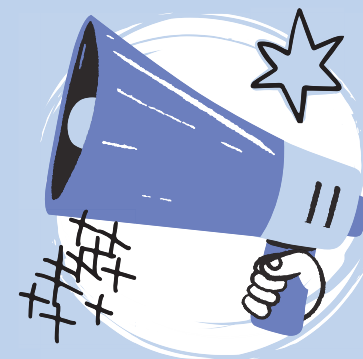

- Look at the demographics of all that were served through the program
- Find any correlations between those variables

HOMELESSNESS IN IOWA

INCARCERATED IN IOWA

WAYPOINT

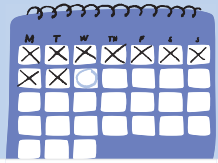

Homeless diversion program for those exiting the 6th judicial branch. Focusing on reintegrating into society.

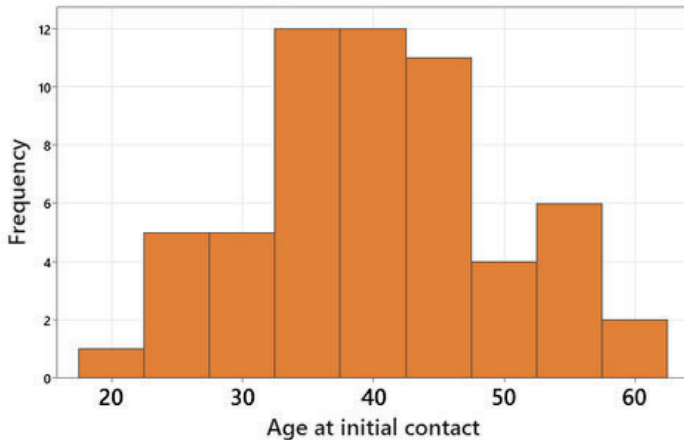

THE TRIO

Luke , Cecy, Mason

AGE AT INITIAL CONTACT

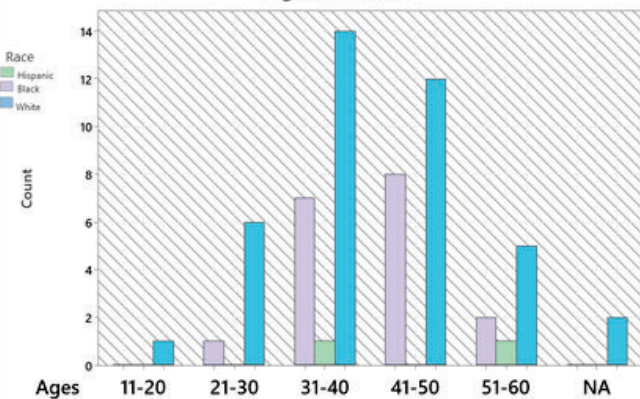

Age at initial contact

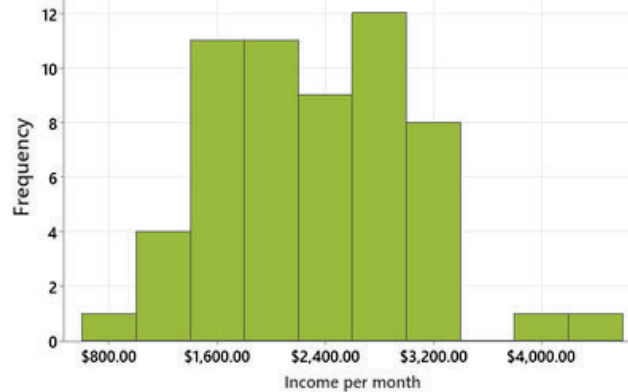

Most people are between the ages 35-45 years old

Age and Race

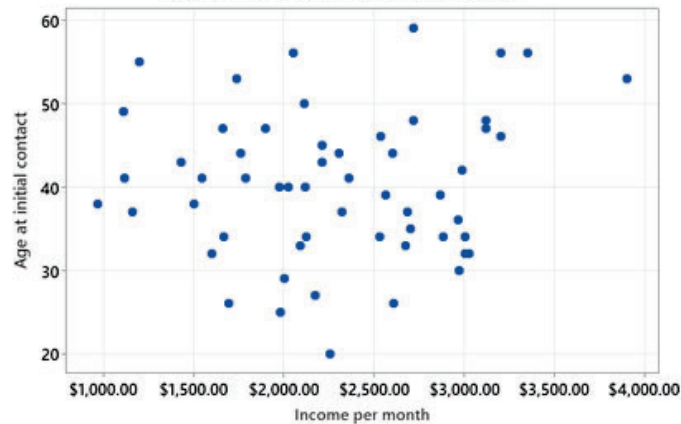

INCOME

Income per month

Income from \$800-\$4000+
Average of \$2,313

Age at initial contact vs Income per month

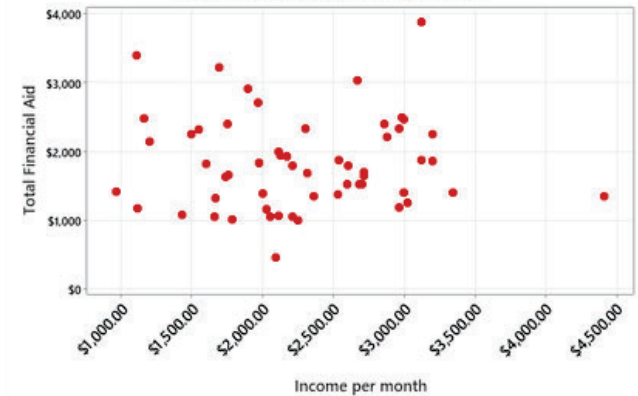

There is no relationship between a person's age and how much they make per month.

FINANCIAL AID

Total Financial Aid vs Income per month

CONCLUSIONS

1

The most surprising statistic data we found was the super majority of men vs women.

2

The Average person would be a white 40 year old man making \$2,313 per month

3

An average on \$1,800 is given to each person to house them

Post-Exit Reengagement with Waypoint

Waypoint helps people achieve and maintain self-sufficiency and family stability through permanent housing

71.4%

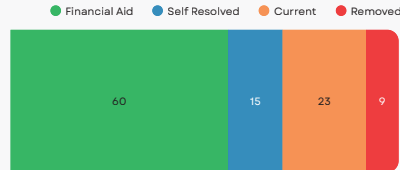

Of Clients Received Financial Assistance or Self Resolved

Client Pools

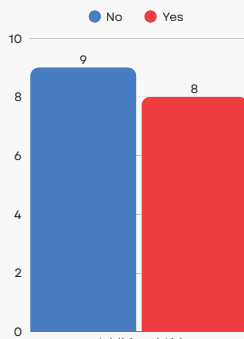

56% Received Aid
15% Self Resolved
20% Current Clients
9% Removed

Financial Aid

80% of the positive outcomes were clients who received aid

Court Interaction Post Aid

Housing Instability

47%

of the people who reached back out had court interaction post Waypoint

28 %

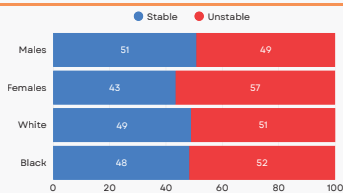

Requested further assistance from Waypoint after receiving aid

Note

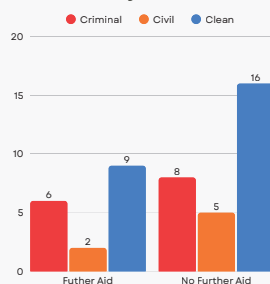

Data contains 46 individuals with a move in date as late as 5/16/25 to allow time to determine stability

Many factors that people typically expect to have impact on housing stability such as gender and race did not appear to have any relationship

Court Trends

People who didn't have further court interactions tended to experience more stability

Potential Misleading Data

Some who didn't request further aid were due to being recently reincarcerated

Sample Demographics
